# 1 INLEIDING

In opdracht van BRO is in het kader van de opstelling van het bestemmingsplan “Schinkelkwadrant-Zuid” te Heerlen door K+ Adviesgroep bv een akoestisch onderzoek uitgevoerd. Het plan voorziet in de mogelijkheid om maximaal 98 woningen en 1000m<sup>2</sup> BVO voor horeca, leisure, en dienstverlening anders dan detailhandel. In onderstaande afbeelding 1.1 is een overzicht opgenomen van de bouwmassa’s in 3D zoals deze in het bestemmingsplan mogelijk worden gemaakt.

Afbeelding 1.1: Bouwmassa’s plan Schinkelkwadrant – Zuid Heerlen.

In het voorliggende rapport zijn de akoestische consequenties opgenomen met betrekking tot:

1. Wegverkeerslawaaï in het kader van de Wet geluidhinder;
2. Geluidtoename vanwege de verkeersaantrekkende werking als gevolg van de realisatie van het plan Schinkelkwadrant bij bestaande woningen en kantoren;
3. Geluid vanwege de expeditie (bevoorrading);
4. Geluid vanwege de evenementen op het Burgemeester van Grunsvenplein en Promenade 1 en Promenade 2.

Ad. 1. Het akoestisch onderzoek is noodzakelijk, omdat de woningen binnen het plan zijn gelegen binnen de geluidzone van verschillende wegen.

Ad. 2. In het kader van een goede ruimtelijke ordening is onderzocht in welke mate de geluidbelasting zal toenemen bij de woningen en kantoren nabij het plan.

Ad. 3. In het kader van een goede ruimtelijke ordening worden aanbevelingen gedaan met betrekking tot het inpassen van de expeditie. Hierbij is gebruik gemaakt van de resultaten van het onderzoek dat is opgesteld voor het bestemmingsplan Maankwartier.

Ad. 4. In het kader van de goede ruimtelijke ordening is gekeken naar de optredende gevelbelastingen bij de nieuwe woningen als gevolg van het evenementenbeleid van de gemeente Heerlen. Het nabijgelegen Burgemeester van Grunsvenplein, Promenade 1 en 2 zijn door de gemeente aangewezen als evenementenlocatie.

De berekeningen zijn gebaseerd op:

- De “Wet geluidhinder”;
- Het “Reken- en Meetvoorschrift geluid 2012”;
- Het “Besluit Geluidhinder”.

## 2 ONDERZOEK WET GELUIDHINDER

### 2.1 Uitgangspunten

#### 2.1.1 Ruimtelijke gegevens

Bij het onderzoek is gebruik gemaakt van door de opdrachtgever verstrekte tekeningen. Daarnaast is gebruik gemaakt van het door de gemeente Heerlen beschikbaar gesteld milieumodel met verkeersgegevens. In bijlage I zijn grafische overzichten opgenomen van de onderzochte situatie.

#### 2.1.2 Verkeersgegevens

De verkeersgegevens zijn gebaseerd op het door de gemeente Heerlen beschikbare uitsnede van het milieumodel scenario Mm 2030. Bij de berekeningen is rekening gehouden met het verkeersbesluit van de gemeente Heerlen van 27 juli 2018 waarbij de maximumsnelheid op de Honigmannstraat tussen de Geerstraat en de Van de Maessenstraat, de Stationstraat tussen de parkeergarage en de Honigmannstraat, de Schinkelstraat en de ventweg aan de Schinkelsstraat parallel aan de Geerstraat wordt teruggebracht naar 30 km/h.

Daarnaast zal de Schinkelstraat komende vanuit de Geerstraat tot circa halverwege de straat tweerichtingsverkeer worden. Dit besluit moet nog worden genomen door de gemeente Heerlen.

De verkeersaantrekkende werking van het plan is bepaald door de gemeente Heerlen, zie bijlage III. Hieruit blijkt dat de weekdaggemiddelde verkeersgeneratie van het plan ca. 433 verkeersbewegingen zullen bedragen.

In tabel 2.1 is een overzicht opgenomen van de gehanteerde verkeersgegevens. De ligging van de wegvakken is opgenomen in figuur 3a van bijlage I.

Tabel 2.1: Overzicht verkeersgegevens Schinkelkwadrant-Zuid Heerlen 2030.

Hierbij is:

Aut: Autonome situatie 2030;  
 Toek: Toekomstige situatie 2030 met plan Schinkelkwadrant-Zuid;  
 Periode verdeling: Gemiddelde uuraandeel betreffende periode in procenten van de etmaalintensiteit;  
 Qlv: Gemiddelde uurintensiteit lichte motorvoertuigen in procenten voor betreffende periode;  
 Qmv: Gemiddelde uurintensiteit middelzware motorvoertuigen in procenten voor betreffende periode;  
 Qzv: Gemiddelde uurintensiteit zware motorvoertuigen in procenten voor betreffende periode;  
 Wegdek: 1: Referentiewegdek; 71: 1-laags ZOAB; 81: gewone elementenverharding;  
 Snelheid: Ter plaatse toegestane maximumsnelheid.

In figuur 3a t/m 3d zijn grafische overzichten opgenomen van de ligging van de wegvakken (3a), de gehanteerde weggroepen met bijbehorende wegvakken (3b), type wegverharding (3c) en maximumsnelheid voor lichte motorvoertuigen (3d). Voor nadere gegevens met betrekking tot de gehanteerde invoer- en uitvoerparameters wordt verwezen naar de in bijlage IIa t/m IIg opgenomen rekenbladen.

### 2.1.3 Toegepaste rekenmethode

De geluidbelastingen zijn bepaald met behulp van “Standaard Rekenmethode 2I”, zoals deze is beschreven in het “Reken- en Meetvoorschrift geluid 2012”.

Bij de modellering van het akoestisch rekenmodel is gebruik gemaakt van het pakket WinHavik als ontwikkeld door dirActivity.

## 2.2 Normstelling Wet geluidhinder

### 2.2.1 Algemeen

In de Wet geluidhinder dient met betrekking tot de geluidbelasting van een weg in nieuwe situaties de geluidbelasting in  $L_{den}$  in dB te worden bepaald. Dit is een gemiddeld geluidniveau over de dag-, avond- en nachtperiode en wordt bepaald met de volgende formule:

$$L_{den} = 10 \lg \frac{1}{24} \left( 12 * 10^{\frac{L_{day}}{10}} + 4 * 10^{\frac{L_{evening} + 5}{10}} + 8 * 10^{\frac{L_{night} + 10}{10}} \right)$$

### 2.2.2 Omvang geluidzones langs wegen

Krachtens de Wet geluidhinder worden aan weerszijden van een weg zones aangegeven (art. 74 Wgh). Binnen deze zones worden eisen gesteld aan de geluidbelasting. Buiten de zones worden geen eisen gesteld.

Een weg is niet zoneplichtig indien er sprake is van:

- wegen die gelegen zijn binnen een als woonerf aangeduid gebied (art. 74 lid 2a. Wgh) of;
- wegen waarvoor een maximum snelheid van 30 km/h geldt (art. 74 lid 2b. Wgh).

De breedte van de geluidzones als functie van het aantal rijstroken van de weg en het soort gebied is weergegeven in tabel 2.2.

Tabel 2.2: Breedte geluidzones aan weerszijde van de weg in meters.

| Gebied          |                      | Breedte (m) geluidzones (art. 74) |
|-----------------|----------------------|-----------------------------------|
| Stedelijk       | 1 of 2 rijstroken    | 200                               |
|                 | 3 of meer rijstroken | 350                               |
| Buitenstedelijk | 1 of 2 rijstroken    | 250                               |
|                 | 3 of 4 rijstroken    | 400                               |
|                 | 5 of meer rijstroken | 600                               |

### 2.2.3 Aftrek conform artikel 110g Wet geluidhinder

Op grond van verdere ontwikkelingen in de techniek en het treffen van geluid reducerende maatregelen aan de motorvoertuigen, is te verwachten, dat het wegverkeer in de toekomst minder geluid zal produceren dan momenteel het geval is.

Binnen de Wet geluidhinder is middels artikel 110g de mogelijkheid geschapen om deze vermindering van de geluidsproductie in de geluidbelasting door te voeren.

Deze aftrek mag alleen toegepast worden bij het toetsen van de geluidbelasting aan de normstelling en niet bij het bepalen van het binnenniveau (artikel 3.4 Reken- en Meetvoorschrift geluid 2012).

De hoogte van de aftrek is afhankelijk van de representatieve snelheid voor lichte motorvoertuigen. In tabel 2.3 is een overzicht opgenomen van de hoogte van de aftrek.

Tabel 2.3: Overzicht aftrek 110 g Wet geluidhinder (artikel 3.4 RMV2012).

| Representatieve snelheid | Aftrek artikel 110g Wgh                                                                  |
|--------------------------|------------------------------------------------------------------------------------------|
| < 70 km/h                | 5 dB                                                                                     |
| ≥ 70 km/h                | 4 dB voor situaties dat de geluidbelasting zonder aftrek artikel 110g Wgh 57 dB bedraagt |
| ≥ 70 km/h                | 3 dB voor situaties dat de geluidbelasting zonder aftrek artikel 110g Wgh 56 dB bedraagt |
| ≥ 70 km/h                | 2 dB voor andere waarden van de geluidbelasting                                          |

### 2.2.4 Aftrek stille banden

In artikel 3.5 van het Reken- en meetvoorschrift geluid 2012 is een aftrek opgenomen voor stille banden. Deze aftrek geldt alleen bij wegen met rijssnelheden van 70 km/h en hoger. Standaard is de aftrek 2 dB. In de volgende situaties is de aftrek 1 dB:

- Zeer Open Asphalt Beton;
- 2-laags ZOAB, met uitzondering van 2-laags ZOAB-fijn;
- Uitgeborsteld beton;
- Geoptimaliseerd uitgeborsteld beton;
- Oppervlaktebewerking.

Een overzicht van de stille bandenaftrek is opgenomen in tabel 2.4.

Tabel 2.4: Overzicht stille banden aftrek.

| Representatieve snelheid | Wegverharding                                                                                      | Correctie artikel 3.5 (stille banden aftrek) |
|--------------------------|----------------------------------------------------------------------------------------------------|----------------------------------------------|
| < 70 km/h                | Alle                                                                                               | 0 dB                                         |
| ≥ 70 km/h                | ZOAB, 2-laags ZOAB, uitgeborsteld beton, geoptimaliseerd uitgeborsteld beton, oppervlaktebewerking | 1 dB                                         |
| ≥ 70 km/h                | Alle andere verhardingen dan bovenstaand vermeld                                                   | 2 dB                                         |

## 2.2.5 Stedelijk en buitenstedelijk gebied

Gebieden binnen de bebouwde kom, met uitzondering van de gebieden binnen de bebouwde kom gelegen binnen de zone langs een autoweg of autosnelweg als bedoeld in het Reglement verkeersregels en verkeerstekens, worden als stedelijk aangemerkt.

Als buitenstedelijke gebieden worden gebieden buiten de bebouwde kom, alsmede de bovengenoemde uitgezonderde gebieden binnen de bebouwde kom aangemerkt.

## 2.2.6 Nieuwe situaties

In al die gevallen waar in de aanleg van een geluidgevoelig object en/of een zoneplichtige weg door vaststelling of herziening van een bestemmingsplan wordt voorzien, is er sprake van 'nieuwe situaties'.

## 2.2.7 Maximaal toelaatbare geluidbelasting voorliggende situatie

Normen met betrekking tot de geluidbelasting in 'nieuwe situaties' zijn in artikel 82 t/m 87 van de Wet geluidhinder (Wgh) voor woningen en in artikel 3.1 en 3.2 van het Besluit geluidhinder (Bgh) voor andere geluidgevoelige bestemmingen vermeld.

In eerste instantie wordt ervan uitgegaan dat een zogenaamde voorkeursgrenswaarde niet mag worden overschreden. Indien maatregelen gericht op het terugbrengen van de geluidbelasting tot de voorkeursgrenswaarde onvoldoende doeltreffend zijn, dan wel stuiten op overwegende bezwaren van stedenbouwkundige, verkeerskundige, landschappelijke of financiële aard kunnen burgemeester en wethouders onder bepaalde door de gemeente vastgestelde beleidsregels een hogere toelaatbare waarde vaststellen. Aan deze ontheffing kunnen aanvullende voorwaarden worden verbonden.

Indien het bouwplan ligt binnen meerdere relevante geluidbronnen dan dient de gecumuleerde belasting naar het oordeel van burgemeester en wethouders niet leiden tot onaanvaardbare geluidbelastingen. Indien de voorkeursgrenswaarde wordt overschreden dan is er in het kader van de Wet geluidhinder sprake van een relevante bron.

Wanneer de maximale ontheffingswaarde wordt overschreden is geen nieuwbouw mogelijk, tenzij het plan voorziet in het oprichten van “dove”-gevels.

In de Wet geluidhinder worden voor nog niet geprojecteerde woningen de volgende eisen gesteld:

- voorkeursgrenswaarde: 48 dB (art. 82, lid 1);
- maximale ontheffingswaarde stedelijk gebied: 63 dB (art. 83, lid 2);
- maximale ontheffingswaarde buitenstedelijk gebied: 53 dB (art. 83, lid 1).

Voor de stadsautoweg (N281) is sprake van een buitenstedelijk gebied, de maximale ontheffingswaarde bedraagt 53 dB. Voor de overige wegen is sprake van een stedelijk gebied, de maximale ontheffingswaarde bedraagt 63 dB.

Niet geprojecteerd betekent dat het vigerende bestemmingsplan geen woonbebouwing toestaat zodat het bestemmingsplan dient te worden herzien.

## **2.3 Berekeningsresultaten nieuwe situaties**

### **2.3.1 Algemeen**

Uitgaande van voornoemde uitgangspunten zijn de te verwachten toekomstige optredende gevelbelastingen bepaald. Als waarneemhoogte is uitgegaan in het midden van de gevel, een en ander afhankelijk van het aantal bouwlagen en de gebouwhoogte. De ligging van de waarneempunten is aangeduid in figuur 2a van bijlage I.

In tabel 2.5 is een overzicht opgenomen van de berekeningsresultaten. Per weg is aangegeven het waarneempunt, de waarneemhoogte, de toetsingswaarde per weg, de maximale bijdrage van de wegen, de toekomstige bestemming, de voorkeursgrenswaarde en de maximale ontheffingswaarde. De maximale ontheffingswaarde bedraagt 53 dB voor de stadsautoweg N281 en 63 dB voor de overige wegen. Voor de stadsautoweg N281 is voor de aftrek conform artikel 110g van de Wet geluidhinder uitgegaan van 2 dB en voor de overige wegen van 5 dB. Voor nadere gegevens met betrekking tot de gehanteerde invoer- en uitvoerparameters wordt verwezen naar de betreffende rekenbladen die in bijlage IIa zijn opgenomen.

De toetsingswaarden bij de geluidgevoelige bestemmingen zijn tegen een gekleurde achtergrond weergegeven. De betekenis hiervan is als volgt:

- Groen: de voorkeursgrenswaarde wordt niet overschreden. In het kader van de Wet geluidhinder worden geen restricties opgelegd.
- Geel: de voorkeursgrenswaarde wordt overschreden, de maximale ontheffingswaarde wordt niet overschreden. Aan de hand van door de gemeente vastgestelde beleidsregels kan onder bepaalde voorwaarden ontheffing worden verleend voor een hogere toelaatbare geluidbelasting.
- Oranje: de maximale ontheffingswaarde wordt overschreden. Voor de betreffende gevel kan geen hogere toelaatbare grenswaarde worden vastgesteld. Woningbouw is niet toegestaan of het plan moet ter plaatse voorzien in een “dove” gevel.

Tabel 2.5: Toetsingswaarden wegverkeerslawaai nieuwe situaties [in dB].

## 2.4 Evaluatie wegverkeerslawaaï

### 2.4.1 Algemeen

Aan de hand van de in tabel 2.5 opgenomen rekenresultaten is in tabel 2.6 is een overzicht opgenomen van de maximaal bepaalde gevelbelasting per wegvak (weggroep).

Tabel 2.6: Maximale gevelbelasting per weg plan Schinkelkwadrant-Zuid.

| Weg               | Bestemming |
|-------------------|------------|
|                   | Wonen      |
| Geerstraat        | 61         |
| Schinkelstraat    | 52         |
| Honigmannstraat   | 47         |
| Looierstraat      | 41         |
| Schakelweg        | 41         |
| Homerusstraat     | 34         |
| Apollolaan        | 34         |
| Valkenburgerweg   | 34         |
| Coriovallumstraat | 33         |
| N281              | 47         |

### 2.4.2 Woonfunctie

- Uit tabel 2.5 blijkt dat vanwege wegverkeerslawaaï van de Geerstraat en de Schinkelstraat plaatselijk overschrijdingen zijn vastgesteld van de voorkeursgrenswaarde van 48 dB. Omdat de Schinkelstraat een 30 km/h weg is wordt in het kader van de Wet geluidhinder geen restricties opgelegd.
- De gevelbelasting vanwege de Geerstraat bedraagt maximaal 61 dB.
- Daarmee bedraagt de overschrijding van de voorkeursgrenswaarde maximaal 13 dB.
- De maximale ontheffingswaarde wordt niet overschreden.
- Indien maatregelen gericht op het terugbrengen van de gevelbelasting stuit op overwegende bezwaren van stedenbouwkundige, landschappelijke of financiële aard kan de gemeente een verzoek tot vaststelling van een hogere toelaatbare waarde inwilligen.  
Voor de Geerstraat is een verkennend onderzoek uitgevoerd naar geluid reducerende maatregelen. De resultaten zijn opgenomen in hoofdstuk 2.5.
- Vanwege de niet gezoneerde weg Schinkelstraat bedraagt de gevelbelasting maximaal 52 dB. Praktisch is het niet mogelijk om voor de Schinkelstraat de gevelbelasting door middel van bronmaatregelen of overdrachtsmaatregelen verder terug te brengen. Enerzijds omdat vanwege het afbuigend verkeer het niet duurzaam is om een geluid reducerende wegverharding aan te brengen, door wringing van de autobanden wordt de top laag kapotgereden. Ook is het niet mogelijk om de verkeersintensiteiten op de Schinkelstraat te verlagen. Daarmee zijn bronmaatregelen niet inpasbaar.  
Het treffen van maatregelen in het overdrachtsgebied zijn praktisch niet toepasbaar, behoudens gebouwgeboden voorhangschermen. Daarmee stuiten overdrachtsmaatregelen op overwegende bezwaren van stedenbouwkundige aard.

## 2.5 Geluid reducerende maatregelen

Voor de Geerstraat is een aanvullend onderzoek uitgevoerd naar het effect van geluid reducerende voorzieningen. De volgende maatregelen zijn onderzocht:

1. Vervangen van bestaande wegverharding van dicht asfaltbeton door stil asfalt type dunne deklaag b;
2. Het oprichten van een geluidscherm langs de Geerstraat. In de berekening is uitgegaan van een 5m hoog geluidscherm.

In tabel 2.7 zijn de resultaten opgenomen van geluid reducerende maatregelen voor de voornoemde wegen. Voor nadere informatie wordt verwezen naar de in de bijlage IIc (Geerstraat stil asfalt) en IId (Geerstraat scherm) opgenomen rekenbladen.

Tabel 2.7: Toetsingswaarden nieuwe situatie met bronmaatregelen [in dB].

## 2.6 Evaluatie en conclusie wegverkeerslawaa

### 2.6.1 Algemeen

Aan de hand van de in tabel 2.7 opgenomen rekenresultaten is in tabel 2.8 een overzicht opgenomen van de maximaal bepaalde gevelbelasting zonder en met maatregelen voor de Geerstra.

Tabel 2.8: Maximale gevelbelasting per weg geluid reducerende maatregelen.

| Weg                                                 | Bestemming | Reductie |
|-----------------------------------------------------|------------|----------|
|                                                     | Wonen      |          |
| Geerstra zonder extra geluidbeperkende maatregelen  | 61         | -        |
| Geerstra met stil asfalt dunne deklaag type b       | 58         | 3        |
| Geerstra met 5m hoog geluidscherm langs de Geerstra | 60         | 1        |

### 2.6.2 Geerstraat

- In waarneempunt 126 t/m 131, 136, 137, 139 en 166 zijn op één of meerdere bouwlagen optredende gevelbelastingen bepaald die hoger zijn dan de voorkeursgrenswaarde van 48 dB.
- De gevelbelasting bedraagt maximaal 61 dB.
- De maximale ontheffingswaarde wordt niet overschreden.
- Indien maatregelen gericht op het terugbrengen van de gevelbelasting stuit op overwegende bezwaren van stedenbouwkundige, landschappelijke of financiële aard kan de gemeente een verzoek tot vaststelling van een hogere toelaatbare waarde inwilligen.
- Bronmaatregelen: Uit tabel 2.7 blijkt dat met een bronmaatregel bestaande uit stil asfalt voor de Geerstraat de geluidbelasting met 2-3 dB zal afnemen. De maximale gevelbelasting neemt af van 61 naar 58 dB. Dit betekent dat naast de kosten voor het aanbrengen van geluidarm asfalt er nog steeds kosten moeten worden gemaakt voor aanvullende geluidwerende gevelmaatregelen om te kunnen voldoen aan de eisen van het Bouwbesluit.
- Overdrachtsmaatregelen: Uit tabel 2.7 blijkt dat een geluidscherm alleen op de lager gelegen verdiepingen effect heeft. Vanaf de vierde bouwlaag neemt de geluidbelasting bij een scherm niet meer af. Omdat een dergelijke maatregel stuit op overwegende bezwaren van landschappelijke, stedenbouwkundige, verkeerskundige en financiële aard en er alsnog voorzieningen aan de gevels moeten worden getroffen, gaat de voorkeur in de voorliggende situatie uit naar gevelmaatregelen.
- In de voorliggende situatie kan als ontheffingscriterium worden aangedragen dat het plan komt ter vervanging van bestaande bebouwing.
- Aan deze ontheffing kan de gemeente aanvullende voorwaarden stellen. Dit kan betekenen dat iedere woning en/of appartement dient te beschikken over een geluidluwe gevel. Hieronder wordt veelal verstaan dat de gevelbelasting niet hoger mag zijn dan de voorkeursgrenswaarde van 48 dB. Ter plaatse van de maximaal 31,5m hoge woontoren kan dit voor de hoekappartementen een probleem vormen. Mogelijke oplossing is dan om de balkons uit te voeren als wintertuinen.

De gemeente Heerlen kan op grond van artikel 4.84 van de Algemene wet bestuursrecht afwijken van haar beleid mocht dit door bijzondere omstandigheden leiden tot onevenredige maatregelen.
- Indien het verzoek tot vaststelling van een hogere toelaatbare waarde door de gemeente wordt ingewilligd, worden eisen gesteld aan de geluidbelasting in de woning, deze mag niet meer bedragen dan 33 dB. In bijlage IIb is een overzicht opgenomen van de minimaal vereiste geluidwering van de gevels binnen het nieuwbouwplan.

### 2.6.3 Schinkelstraat

- De Schinkelstraat ligt in een 30 km/h gebied. In het kader van de Wet geluidhinder worden bij 30 km/h wegen geen restricties opgelegd aan de optredende gevelbelastingen. In het kader van de RO dient wel een afweging te worden gemaakt. Onderstaande afweging is opgesteld overeenkomstige de systematiek van de Wet geluidhinder.

- In waarneempunt 159 t/m 166 zijn op één of meerdere bouwlagen optredende gevelbelastingen bepaald die hoger zijn dan de voorkeursgrenswaarde van 48 dB.
- De gevelbelasting bedraagt maximaal 52 dB.
- De maximale ontheffingswaarde wordt niet overschreden.
- Afweging geluidbeperkende maatregelen.

Bronmaatregelen: Praktisch is het niet mogelijk om de gevelbelasting door middel van bronmaatregelen te reduceren. Vanwege afbuigend verkeer is het niet duurzaam om een geluid reducerende wegverharding aan te brengen omdat door wringing van de autobanden de top laag kapot wordt gereden. Ook is het niet mogelijk om de verkeersintensiteiten te verlagen. Daarmee zijn bronmaatregelen niet inpasbaar.

Overdrachtsmaatregelen: Het treffen van maatregelen in het overdrachtsgebied zijn praktisch niet toepasbaar, behoudens gebouwgeboden voorhangschermen. Daarmee stuiten overdrachtsmaatregelen op overwegende bezwaren van stedenbouwkundige aard.

- In de voorliggende situatie is het niet mogelijk om een geluidscherm langs de Schinkelstraat aan te brengen omdat een dergelijke maatregel stuit op overwegende bezwaren van landschappelijke, stedenbouwkundige, verkeerskundige en financiële aard.
- In de voorliggende situatie gaat de voorkeur uit naar gevelmaatregelen. Geadviseerd wordt om overeenkomstig de systematiek van de Wet geluidhinder/Bouwbesluit maatregelen te treffen waarmee de karakteristieke geluidwering van de nieuwe woningen tenminste gelijk is aan de optredende gevelbelasting (zonder aftrek artikel 110g Wgh.) min 33 dB.

#### **2.6.4 Honigmannstraat**

- De Honigmannstraat ligt in een 30 km/h gebied. In het kader van de Wet geluidhinder worden bij 30 km/h wegen geen restricties opgelegd aan de optredende gevelbelastingen. In het kader van de RO dient wel een afweging te worden gemaakt. Onderstaande afweging is opgesteld overeenkomstig de systematiek van de Wet geluidhinder.
- Uit tabel 2.5 blijkt dat de optredende gevelbelastingen zullen voldoen aan de voorkeursgrenswaarde van 48 dB.

#### **2.6.5 Looierstraat**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

#### **2.6.6 Schakelweg**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

#### **2.6.7 Homerusstraat**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

#### **2.6.8 Apollolaan**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

#### **2.6.9 Valkenburgerweg**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

**2.6.10 Coriovallumstraat**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

**2.6.11 Autoweg N281**

- Uit tabel 2.5 blijkt dat de gevelbelasting voldoet aan de voorkeursgrenswaarde van 48 dB.

### 3 ONDERZOEK VERKEERSAANTREKKENDE WERKING

#### 3.1 Algemeen

Ter plaatse van woningen en kantoren nabij het plan kan als gevolg van de verkeersaantrekkende werking de geluidbelasting toenemen. In het kader van de ruimtelijke afweging is hier onderzoek naar verricht.

#### 3.2 Uitgangspunten

Voor de gehanteerde ruimtelijke gegevens en verkeersgegevens wordt verwezen naar hoofdstuk 2.1.

#### 3.3 Resultaten verkeersaantrekkende werking bestaande situaties

Met de realisatie van het plan Schinkelkwadrant – Zuid zal de verkeersintensiteit op met name de Schinkelstraat, Honigmannstraat en Geerstraat toenemen, zie tabel 2.1. Voor deze wegen zijn de optredende gevelbelastingen bepaald voor de toekomstige autonome situatie zonder plan en voor de toekomstige situatie met plan Schinkelkwadrant.

Aan de hand hiervan is de geluidtoename bij de gevels van geluidgevoelige objecten bepaald. Hierbij is aangesloten bij de systematiek van de Wet geluidhinder, oftewel een toename van 2 dB of meer. Indien de toekomstige gevelbelasting lager of gelijk is aan de voorkeursgrenswaarde van 48 dB dan is de toename vastgesteld op 0 dB omdat te allen tijde mag worden opgevuld tot 48 dB.

In tabel 3.1 zijn de resultaten voor de Geerstraat, in tabel 3.2 voor de Schinkelstraat en in tabel 3.3 voor de Honigmannstraat weergegeven. De ligging van de waarneempunten is opgenomen in figuur 2b en 2c van bijlage I.

### 3.4 Evaluatie verkeersaantrekkende werking bestaande situatie

#### 3.4.1 Geerstraat

Ter hoogte van bestaande woningen en kantoren is vanwege de Geerstraat een zeer geringe toename van de geluidbelasting vastgesteld als gevolg van de verkeersaantrekkende werking. De toename bedraagt ten hoogste 0,16 dB. De toename is lager dan de drempelwaarde 2 dB van artikel 1 van de Wet geluidhinder bij wegreconstructie(s).

Er zijn geen aanvullende maatregelen nodig om een goed woon- en leefklimaat te waarborgen. Echter omdat langs dit wegvak ter hoogte van waarneempunt 98 t/m 107 zogenaamde saneringswoningen zijn gelegen en ter plaatse van de nieuwe woningen vanwege verkeerslawaaï van de Geerstraat de voorkeursgrenswaarde wordt overschreden is toch een verkennend onderzoek gedaan naar het effect van bronmaatregelen indien de bestaande wegverharding van

glad asfalt zou worden vervangen door stil asfalt type dunne deklaag b. In hoofdstuk 3.5 zijn de resultaten opgenomen.

### 3.4.2 Schinkelstraat

De Schinkelstraat is gelegen in een 30 km/h zone. In het kader van de Wet geluidhinder worden geen restricties opgelegd. Overeenkomstig de systematiek van de Wet geluidhinder is een afweging gemaakt.

Ter hoogte van bestaande geluidgevoelige objecten langs de Schinkelstraat is in waarneempunt 112 en 175 een toename van de geluidbelasting bepaald van 2 dB of meer. De toename is meer dan de drempelwaarde van 2 dB van artikel 1 van de Wet geluidhinder. De weg wordt fysiek niet gewijzigd, in het kader van de Wet geluidhinder is er geen verplichting om deze toename ongedaan te maken. In het kader van de ruimtelijke ordening is onderstaand een afweging opgenomen naar maatregelen om de geluidbelasting terug te brengen.

Volgens de BAG-viewer zijn aan de Schinkelstraat in hoofdzaak kantoren gevestigd. Alleen ter plaatse van waarneempunt 112 is een woning gelegen.

De maximumsnelheid op deze weg is reeds teruggebracht tot 30 km/h. Omwille van afbuigend verkeer is het niet duurzaam om een geluid reducerende wegverharding aan te brengen omdat door wringing van de autobanden de toplaag kapot wordt gereden. In het centrum van Heerlen is sprake van een uitgekristalliseerde verkeersstructuur. Het is niet mogelijk om de verkeersintensiteiten op deze weg te verlagen. Op grond van het vorenstaande zijn bronmaatregelen niet inpasbaar. Het treffen van maatregelen in het overdrachtsgebied zijn eveneens praktisch niet toepasbaar.

Op grond van het vorenstaande blijkt dat het niet mogelijk is om de gevelbelasting terug te brengen, daarmee resteren eventuele gevelmaatregelen die als doel hebben om de belasting in de woning terug te brengen tot een acceptabele waarde.

Uit tabel 3.2 blijkt dat de gevelbelasting in waarneempunt 112 (woning) maximaal 52 dB bedraagt en bij de kantoren waarneempunt 175 maximaal 52 dB. Zonder aftrek artikel 110g Wet geluidhinder is de gevelbelasting 5 dB hoger. Omdat een bestaande gevel een geluidwering heeft van rond de 20 dB, kan worden afgeleid dat de geluidbelasting in de woning rond de 37 dB zal bedragen. Bij kantoren zal de situatie vergelijkbaar zijn. Op grond van het vorenstaande mag worden aangenomen dat de geluidbelasting in de woning altijd lager zal zijn dan 43 dB, de binnenwaarde die de Wet geluidhinder toestaat in bestaande situaties.

Omdat de geluidbelasting in de bestaande toestand zal voldoen aan de binnenwaarde van 43 dB kan worden gesteld dat er sprake zal zijn van een acceptabel woon- en leefklimaat.

### 3.4.3 Honigmannstraat

De Honigmannstraat is gelegen in een 30 km/h zone. In het kader van de Wet geluidhinder worden geen restricties opgelegd. In overeenstemming met de systematiek van de Wet geluidhinder is een afweging gemaakt.

Ter hoogte van bestaande geluidgevoelige objecten langs de Honigmannstraat is in waarneempunt 108 en 120 t/m 125 een toename van de geluidbelasting vastgesteld. De toename

bedraagt minder dan 2 dB. De toename voldoet aan artikel 1 van de Wet geluidhinder en daarmee is er geen noodzaak om de gevelbelasting verder te reduceren. Er is sprake van een acceptabele geluidtoename.

### 3.5 Geluidreducerende maatregelen

Voor de Geerstraat is een aanvullend onderzoek uitgevoerd naar het effect van geluidreducerende voorzieningen. De volgende maatregelen zijn onderzocht:

1. Geerstraat: vervangen van bestaande wegverharding van dicht asfaltbeton door stil asfalt type dunne deklaag b. In figuur 6a van bijlage I is een grafisch overzicht opgenomen van de geluidarme wegvakken. Nabij de kruising met de Schakelweg kan geluidarm asfalt niet worden toegepast, hier is de bestaande wegverharding gehandhaafd.

In tabel 3.4 zijn de resultaten opgenomen van geluidreducerende maatregelen voor de voornoemde wegen. Voor nadere informatie wordt verwezen naar de in de bijlage IIe t/m IIg opgenomen rekenbladen. Als de geluidbelastingen tegen een groene achtergrond zijn weergegeven voldoet de geluidbelasting aan de voorkeursgrenswaarde van 48 dB. De ligging van de waarneempunten is weergegeven in figuur 2b en 2c van bijlage I.

Tabel 3.4: Toetsingswaarden bestaande situaties met bronmaatregelen [in dB].

### 3.6 Evaluatie geluidreducerende maatregelen bestaande wegen

#### 3.6.1 Geerstraat

Het vervangen van de bestaande wegverharding door een geluidarme wegverharding dunne deklaag type b zal de gevelbelasting iets afnemen. De reductie ligt tussen de 0 en 3 dB.

Uit tabel 3.1 blijkt dat zonder maatregelen de toename beperkt is. Om een goed woon- en leefklimaat te waarborgen zou deze maatregel niet noodzakelijk zijn. In het kader van het opstellen van het saneringsprogramma zou dit mogelijk kunnen worden overwogen.

## 4 ONDERZOEK EXPEDITIE

### 4.1 Inleiding

In het kader van een goede ruimtelijke ordening dient onderzoek te worden verricht naar de geluidbelastingen vanwege de expeditie. De toegestane commerciële functies, niet zijnde detailhandel, zijn vaak type A inrichtingen, waarvoor geen melding hoeft te worden gedaan in het kader van het Activiteitenbesluit.

Wanneer echter meer dan vier transportbewegingen met vrachtwagens in de avond- of nachtperiode plaatsvinden, of als sprake is van het ten gehore brengen van muziek met een niveau van meer dan 70 dan wel 80 dB(A) (bij respectievelijk in- of aanpandige of bij niet aanpandige geluidgevoelige bestemmingen) is sprake van een type B inrichting en dient een melding te worden gedaan. Beide type inrichtingen dienen te voldoen aan het gestelde in het Activiteitenbesluit. Bij een type B inrichting kan het bevoegd gezag een aanvullend akoestisch onderzoek verlangen waaruit de geluidbelasting op omliggende geluidgevoelige bestemmingen blijkt.

### 4.2 Normstelling

Het Activiteitenbesluit stelt eisen met betrekking tot de langtijdgemiddelde beoordeling-niveaus ( $L_{Ar,LT}$ ) en de maximale niveaus ( $L_{A,max}$ ) ten gevolge van een inrichting op de gevels van geluidgevoelige bestemmingen. Deze eisen staan vermeld in onderstaande tabel 4.1.

Tabel 4.1: Geluideisen Activiteitenbesluit.

| Situatie                                         | geluidruimte in dB(A) |       |       |
|--------------------------------------------------|-----------------------|-------|-------|
|                                                  | dag                   | avond | nacht |
| $L_{Ar,LT}$ op de gevel van geluidgevoelige      | 50                    | 45    | 40    |
| $L_{Ar,LT}$ in in- of aanpandige geluidgevoelige | 35                    | 30    | 25    |
| $L_{A,max}$ op de gevel van geluidgevoelige      | 70                    | 65    | 60    |
| $L_{A,max}$ in in- of aanpandige geluidgevoelige | 55                    | 50    | 45    |

Conform artikel 2.17 lid b van het Besluit mogen de maximale niveaus ten gevolge van laad- en losactiviteiten in de dagperiode buiten beschouwing worden gelaten.

### 4.3 De voorliggende situatie

Het bouwplan ligt in het centrum van Heerlen. De Promenade en de Honigmannstraat zijn ingericht als voetgangersgebied, zie figuur 4.1. Door de gemeente Heerlen zijn voor het rijden in het voetgangersgebied beleidsregels opgezet. De gemeente heeft aangegeven terughoudend te zijn met het verlenen van ontheffingen.

Bij laad- en losactiviteiten in de buitenlucht kunnen piekgeluiden voorkomen van circa 110 dB(A). Omdat de gebouwen in het centrum redelijk dicht op elkaar staan kan vanuit akoestisch oogpunt worden gesteld dat de piekbelastingen bij woningen vanwege laad- en losactiviteiten hoger zullen zijn dan de geluideisen als gesteld in het Activiteitenbesluit. Het Activiteitenbesluit heeft in de dagperiode voor piekgeluiden vanwege laad- en losactiviteiten een uitzondering gemaakt. Dergelijke piekgeluiden mogen tussen 07 en 19 uur buiten beschouwing worden gelaten.

In de avond- en nachtperiode kunnen piekgeluiden in de openlucht vanwege de expeditie bij de geluidgevoelige bestemmingen hoger zijn dan de toelaatbare grenswaarden. Aangezien de gemeente Heerlen in januari 2014 een verkeersbesluit heeft genomen om het centrum van Heerlen in te stellen als voetgangersgebied. Het betreft de Akerstraat tussen de Putgraaf en het Pancratiusplein, de Uilegats, de Plaarstraat, de Morenhoek, de Oude Veemarktstraat, de Geleenstraat tussen de Dr. Poelstraat en het Pancratiusplein, het Pancratiusplein, de Pancratiusstraat tussen het Pancratiusplein en de Gasthuisstraat, de Oranje-Nassastraat, de Saroleastraat, de Honingmanstraat tussen de Schinkelstraat en de Geleenstraat, het Stationsplein, de Stationstraat tussen de toegang van de Coriencentrum-garage en het politiebureau Heerlen-centrum, de van der Maesenstraat, de Dautzenbergstraat, de Promenade 1 en 2 en de Bongerd tussen de Promenade 1 en de Oranje-Nassastraat. Door middel van een onderbord is aangegeven dat fietsen in het gebied wel is toegestaan, laden en lossen en overig verkeer alleen is toegestaan tussen 07.30 en 12.00 uur, is laden en lossen in de avond- en nachtperiode in het centrum van Heerlen niet toegestaan.

Figuur 4.1: Bebording binnenstad Heerlen (bron: gemeente Heerlen).

## **4.4 Evaluatie expeditie**

### **4.4.1 Woonfunctie**

Door middel van een verkeersbesluit van januari 2014 is het centrum van Heerlen ingesteld als voetgangersgebied. Binnen dit gebied is laden en lossen alleen toegestaan tussen 07.30 en 12.00 uur, de dagperiode. In de avond- (19-23u) en nachtperiode (23-07u) is geen laden en lossen toegestaan.

Het laden en lossen zal met name ter plaatse van de hoek Promenade-Geerstraat en hoek Promenade-Honigmannstraat zijn geconcentreerd. Aan de Promenade liggen in de huidige situatie ook winkels die bevoorraad moeten worden. De piekgeluiden die daarbij optreden zijn vergelijkbaar met de piekgeluiden die als gevolg van de ontwikkeling zullen optreden. Met de realisatie van het plan zal alleen het aantal pieken in de dagperiode toenemen, de maximale geluidsniveaus van de piekgeluiden niet. Daarmee vormt de expeditie geen belemmering.

## 5 ONDERZOEK EVENEMENTEN

### 5.1 Algemeen

Nabij het plan Schinkelkwadrant-Zuid liggen 3 evenemententerreinen. Het gaat om de volgende locaties:

1. Burgemeester van Grunsvenplein;
2. Promenade 1;
3. Promenade 2.

In het evenementenbeleid heeft de gemeente Heerlen binnen de gemeente een inventarisatie gemaakt van de terreinen die in aanmerking komen dan wel worden gebruikt voor het organiseren evenementen voor cultuur en/of muziek. Om de geluidoverlast te regelen worden afhankelijk van het soort evenement eisen gesteld. In de vergunning van een evenement worden geluidvoorschriften opgenomen.

Onderstaand is voor de 3 aangegeven evenemententerreinen een overzicht opgenomen van de evenementen en de bijbehorende geluidvoorschriften.

Burgemeester van Grunsvenplein:

- 3 evenementen dagen tot 20.00 uur met 70 dB (A);
- 13 evenementen dagen tot 23.00/00.00 uur met 70 dB(A);
- 4 evenementen dagen tot 23.00/00.00 uur met 85 dB(A)<sup>1</sup>;
- 10 kermis dagen tot 23.00/00.00 uur met 80 dB(A).

Promenade 1:

- 3 evenementen dagen tot 20.00 uur met 70 dB (A);
- 10 kermis dagen tot 23.00/00.00 uur met 80 dB(A).

Promenade 2:

- 2 evenementen dagen tot 20.00 uur met 70 dB (A);
- 4 evenementendag tot 23.00/0.00 uur met 70 dB(A).
- 10 kermis dagen tot 23.00/00.00 uur met 80 dB(A).

In de bovenstaande geluideisen wordt geen straffactor voor muziekgeluid toegepast. Het betreft het invallend geluid op de gevel van geluidgevoelige bestemmingen aan/bij het evenemententerrein.

---

- <sup>1</sup> uitzondering voor Aod op Nuj eindtijd 01.00 uur

## 5.2 De voorliggende situatie

In het kader van de goede ruimtelijke ordening dient rekening te worden gehouden met geluid van de evenementen.

In de vergunning die voor een evenement wordt afgegeven, worden geluidvoorschriften opgenomen. Aan de hand van de in hoofdstuk 5.1 opgenomen geluidvoorschriften kan het volgende worden geconcludeerd:

1. Op het Burgemeester van Grunsvenplein kunnen jaarlijks 30 evenementdagen worden gehouden die voor geluidoverlast kunnen zorgen. Van deze 30 evenementdagen mag bij 4 evenementdagen de gevelbelasting maximaal 85 dB(A) bedragen, bij 10 kermisdagen maximaal 80 dB(A) en bij de overige 16 evenementdagen maximaal 70 dB(A).
2. Op Promenade 1 kunnen jaarlijks 13 evenementen worden gehouden die geluidoverlast kunnen veroorzaken. Van deze 13 evenementdagen gaat het om 10 kermisdagen met een gevelbelasting van maximaal 80 dB(A) en bij de overige 3 evenementdagen mag de gevelbelasting maximaal 70 dB(A) bedragen.
3. Op Promenade 2 kunnen jaarlijks 16 evenementen worden gehouden die kunnen zorgen voor geluidoverlast. Van deze 16 dagen gaat het om 10 kermisdagen met een toelaatbare gevelbelasting van 80 dB(A) en bij de overige 6 evenementdagen mag de gevelbelasting maximaal 70 dB(A) bedragen.

Resumé:

De evenementen die het meeste geluid mogen maken zijn:

- 4 evenementdagen op het Burgemeester van Grunsvenplein met een gevelbelasting van maximaal 85 dB(A);
- 10 kermisdagen op het Burgemeester van Grunsvenplein, Promenade 1 en 2 met een gevelbelasting van maximaal 80 dB(A).

## 5.3 Evaluatie evenementen

Met het evenementenbeleid worden festiviteiten mogelijk gemaakt die tijdelijk meer geluid mogen veroorzaken. In het kader van het vaststellen van het evenementenbeleid heeft de gemeente Heerlen aan de hand van de geluidemissies van evenementen een afweging gemaakt van aanvaardbare gevelbelastingen bij bestaande geluidgevoelige bestemmingen.

Omdat de nieuwe woningen binnen het programma Schinkelkwadrant-Zuid zijn gelegen nabij bestaande geluidgevoelige objecten vormen de evenementen geen belemmering voor de nieuwe woningen van het programma Schinkelkwadrant-Zuid.

## 6 EVALUATIE EN CONCLUSIE

### 6.1 Wegverkeerslawaaï nieuwe situaties Wet geluidhinder

- Vanwege wegverkeerslawaaï van de Geerstraat zijn ter plaatse van de gevels van woonbestemmingen overschrijdingen vastgesteld van de voorkeursgrenswaarde van 48 dB.
- De maximale ontheffingswaarde van 63 dB voor de binnenstedelijke wegen wordt niet overschreden.
- Bij de gemeente Heerlen dient een verzoek tot vaststelling van een hogere toelaatbare waarde te worden ingediend.
- Indien dit verzoek wordt ingewilligd, worden eisen gesteld aan de optredende geluidbelasting in de woning, deze mag niet meer bedragen dan 33 dB. In bijlage IIb is een overzicht opgenomen van de minimaal vereiste geluidwering van de gevels binnen het nieuwbouwplan.

### 6.2 Wegverkeerslawaaï nieuwe situaties ruimtelijke ordening

- Vanwege wegverkeerslawaaï van de niet-gezoneerde wegvakken worden in het kader van de Wet geluidhinder geen restricties opgelegd. In het kader van de ruimtelijke afweging dient daar wel rekening mee te worden gehouden. Vanwege wegverkeerslawaaï van de Schinkelstraat zijn ter plaatse van de gevels van de nieuwe woonbestemmingen gevelbelastingen bepaald hoger dan de voorkeursgrenswaarde van 48 dB.
- De maximale ontheffingswaarde van 63 dB voor de binnenstedelijke wegen wordt niet overschreden.
- De maximumsnelheid op deze wegen is reeds verlaagd naar 30 km/h. Er zijn geen aanvullende maatregelen aan de bron en/of overdrachtsgebied mogelijk om de gevelbelasting terug te brengen.
- Om een goed woon- en leefklimaat in de nieuwe woningen te kunnen waarborgen wordt geadviseerd om overeenkomstige de systematiek van de Wet geluidhinder/Bouwbesluit maatregelen te treffen waarmee de karakteristieke geluidwering van de nieuwe woningen tenminste gelijk zal zijn aan het verschil tussen de optredende gevelbelasting (ex. Aftrek artikel 110g Wgh.) en 33 dB.
- In bijlage IIb is een overzicht opgenomen van de minimaal vereiste geluidwering van de gevels binnen het nieuwbouwplan.

### 6.3 Verkeersaantrekkende werking

- Vanwege de verkeersaantrekkende werking is bij de bestaande geluidgevoelige bestemmingen langs de Schinkelstraat een toename van de gevelbelasting bepaald van 2-3 dB.
- In het kader van de Wet geluidhinder zijn geen regels opgenomen om deze toename ongedaan te maken.
- Gezien de te verwachten optredende gevelbelastingen en de bestaande geluidwering van de gevel zal de geluidbelasting in de geluidgevoelige vertrekken van de woning voldoen

aan de binnenwaarde van 43 dB. Daarmee is er sprake van een acceptabel woon- en leefklimaat.

#### **6.4 Expeditie**

- De piekbelasting vanwege laad- en losactiviteiten van de expeditie in de buitenlucht levert hoge belastingen op. Op grond van het verkeersbesluit uit januari 2014 is in het centrum van Heerlen een voetgangersgebied ingesteld en binnen dit gebied is laden en lossen alleen toegestaan in de dagperiode. Omdat in de huidige situatie ook winkels binnen het gebied liggen die bevoorraad worden vormt de expeditie geen belemmering.

#### **6.5 Evenementen**

- Vanwege de evenementen op het Burgemeester van Grunsvenplein, Promenade 1 en 2 worden in de evenementenvergunning eisen gesteld aan de maximale geluidbelastingen op de gevels van geluidgevoelige objecten. Hiermee is in het verleden aan afweging gemaakt van de toelaatbare geluidniveaus.
- De nieuwe woningen binnen het programma Schinkelkwadrant-Zuid zijn gelegen nabij bestaande geluidgevoelige objecten. Daarmee vormen de evenementen geen belemmering voor de nieuwe woningen van het programma Schinkelkwadrant-Zuid.

Onderwerp  
Parkeren en Verkeersgeneratie Schinkelkwadrant Zuid

### **Algemeen**

Voor het bepalen van de parkeerbehoefte wordt uitgegaan van een feitelijk en planologisch veranderde situatie. De ontwikkeling Schinkelkwadrant Zuid vindt plaats binnen een gebied waar reeds lange tijd sprake is van leegstand. Een groot deel van de bestaande gebouwen zal worden gesloopt. Voor het bepalen van de parkeerbehoefte is uitgegaan van de nieuwe situatie.

### **Parkeren**

#### *Auto*

Conform de vigerende parkeernormen (Parkeernota Heerlen 2010) dient een woning met een ligging in het 'centrum' gekoppeld te worden aan een parkeernorm van 1,5 parkeerplaats per wooneenheid. Ten behoeve van de woonfunctie (98 wooneenheden) bedraagt de parkeerbehoefte daarmee in totaal 147 parkeerplaatsen.

Verder zal er sprake zijn van de realisatie van 1000 m<sup>2</sup> BVO horeca en 279 m<sup>2</sup> BVO aan commerciële functies (Honigmannstraat). Conform de Parkeernota Heerlen (bijlage 6) geldt er in het gebied 'Centrum' een algehele vrijstelling voor alle vormen van horeca en voor winkels kleiner dan 1500 m<sup>2</sup> BVO. Voor de voornoemde functies hoeft daarmee geen parkeerbehoefte te worden bepaald.

Bijgevolg bedraagt de maximale parkeerbehoefte voor de ontwikkeling 147 parkeerplaatsen, die in beginsel op eigen terrein gerealiseerd dienen te worden. Het plan voorziet in de realisatie van minimaal 98 en maximaal 116 parkeerplaatsen op eigen terrein in het plangebied. Het realiseren van meer parkeerplaatsen in het plangebied wordt omwille van kwaliteitseisen niet wenselijk geacht. Zo kan de aanleg van meer parkeerplaatsen leiden tot een verstoring van de gewenste ruimtelijke en groene kwaliteiten van het binnengebied. Daarnaast wordt het parkeren enkel rechtstreeks onder de gebouwen en in de binnenhoven gefaciliteerd. Parkeren onder en in de openbare ruimte wordt, mede omwille van infiltratie-eisen, in beginsel niet wenselijk geacht.

Conform bijlage 3 van de Parkeernota Heerlen 2010 kan er, indien er op eigen terrein onvoldoende ruimte is of indien het financieel niet haalbaar is om een toereikende parkeervoorziening te realiseren, uitgeweken worden naar de (semi-)openbare ruimte. Dit laatste vraagt te allen tijde een nadere afweging van het gemeentebestuur en behoeft een ontheffing.

De geactualiseerde parkeerbalans geeft aan dat er in het centrum een overschot aan parkeerplaatsen is. Rekening houdend met de volledige ontwikkeling van het Schinkelkwadrant is er nog steeds sprake van een aanzienlijke overcapaciteit. Het verlenen van een eventuele ontheffing is derhalve haalbaar zijn.

#### *Fiets*

Met betrekking tot het fietsparkeren ziet het Bouwbesluit er op toe dat er dat er een minimaal benodigde oppervlaktemaat aan stallingsruimte wordt gereserveerd. Per wooneenheid dient, conform het facetbestemmingsplan 'Stedenbouwkundige bepalingen', een stallingsruimte voor twee fietsen voorzien te zijn. Ten behoeve van de stallingsruimte voor fietsen m.b.t. de horecavoorziening geldt een norm van 15 fietsen per 100 m<sup>2</sup> BVO. Uitwerking hiervan volgt ten tijde van de omgevingsvergunning.

### **Verkeersgeneratie en -ontsluiting**

#### *Verkeersgeneratie*

De volledige extra verkeersgeneratie van het plan wordt enkel voor de functie wonen berekend. De bezoekersaantallen voor de overige functies zitten al verwerkt in eerdere berekeningen van het centrum als onderdeel van de ontwikkeling van de parkeergarages in het centrum. De horeca- en retailfunctie in dit plan maken immers gebruik van de bestaande parkeergelegenheden en die zijn in het verleden ten behoeve van de verkeersgeneratie al voor de totale capaciteit meegenomen.

Met behulp van de CROW-rekentool 'Parkeren en Verkeersgeneratie' kan berekend worden dat de vestiging van 98 woningen zal leiden tot een verkeersgeneratie van maximaal 400 motorvoertuigen per etmaal.

Wat resteert is het incidenteel zoekverkeer/bevoorrading van de horeca en de retailfunctie. Het aandeel bezoekers van retail in het centrum maakt 94% uit van de totale verkeersgeneratie in het centrum. Het aandeel bezoekers van horeca maakt 90% uit van de totale verkeersgeneratie.

Voor de bepaling van de 1000 m<sup>2</sup> BVO horeca zijn er geen kencijfers omtrent de verkeersgeneratie voorhanden. Uitgaande van 80 benodigde parkeerplaatsen (o.b.v. de vigerende parkeernormen) en een gemiddeld aantal parkeerwisselingen (turn-over) van twee kan worden gesteld dat deze functie een verkeersgeneratie heeft van 320 motorvoertuigen per etmaal. Dit resulteert in 32 motorvoertuigen per etmaal zoekverkeer/bevoorrading (zijnde 10% van 320) gerelateerd aan de horecafunctie.

De berekening van de verkeersgeneratie van de retailfunctie kan dan weer gebaseerd worden op een algemene gecombineerde binnenstadsfunctie op

gebied van detailhandel, hetgeen overeenkomt met 10 motorvoertuigen per etmaal. Dit resulteert in 1 motorvoertuigen per etmaal zoekverkeer/bevoorrading (zijnde 6% van 10) gerelateerd aan de retailfunctie.

Bijgevolg kan worden gesteld dat de gehele ontwikkeling zal leiden tot een maximale verkeersgeneratie van circa 433 motorvoertuigen per etmaal.

#### *Verkeersontsluiting*

De ontsluiting van het plangebied vindt plaats via de Geerstraat, Honigmannstraat en de Schinkelstraat. Deze wegen kunnen de extra verkeersgeneratie zonder meer afwikkelen. Voor de Schinkelstraat en de Honigmannstraat is de verwachte intensiteit 1633 motorvoertuigen (= 1200 (huidig) + 433 (maximale toename door de ontwikkeling Schinkelkwadrant Zuid), hetgeen nog steeds ruim beneden de maximale intensiteit van 4000 motorvoertuigen voor erftoegangswegen ligt. Voor de Geerstraat geldt dat de intensiteit toeneemt van 9700 (huidig) naar 10.133 motorvoertuigen per etmaal. Dit is nog binnen de intensiteit die voor een gebiedsontsluitingsweg, zoals de Geerstraat, van om en nabij 20.000 motorvoertuigen per etmaal acceptabel wordt geacht. Als vuistregel voor intensiteiten op gebiedsontsluitingswegen worden intensiteiten tussen 15.000 en maximaal 20.000 motorvoertuigen per etmaal als acceptabel beschouwd, afhankelijk van de capaciteit van de kruisingen in het wegvak. Gesteld kan worden dat – gelet op de functie van de weg, deze vuistregel en de ervaringen in de huidige situatie – de optredende verkeersintensiteiten uit het oogpunt van verkeersafwikkeling niet leiden tot knelpunten.
