Dear Madam or Sir,

We live in Wiegmanweg 1, corner Van Zuylen van Nijvelt straat (next to the roundabout).

The noise coming from the cars day and night is unbearable. The same can be said to the amount car exhausts we are exposed to.

We are surprised to see in the "Ontwerp actieplan geluid 2018-2023" that nothing will be done to change this all. Even a stille wegdek is out of consideration.

Please note that the health of the people living particularly in this area is at risk.

Apart from us, we are also concerned about our neighbours living along the Wiegmanweg below the level of the street.

As fine particles and other pollutants are heavier than air they are likely to accumulate in the apartments, which could seriously damage their health..

We would appreciate very much if the municipality considered to solve the problems of noise and pollution in Wiegmanweg / Van Zuylen van Nijvelt straat, which area is perhaps most strongly exposed to traffic in Wassenaar.

Best regards,
