This digital information has been created with the utmost care. However, it could be possible that the information needs some adaption to your specialism. Check the file against the (technical) information known to you and contact DartGroup if this differs. If this document does not comply with the necessary specifications and/or if you have any questions regarding the following points, please contact us. This digital information may only be changed with the prior authorization of DartGroup.

- The colors of the accompanying laser prints are indicative only and cannot be used as color references.
- Any accompanying X-Color proofs are for reference purposes. PMS colors are approximated in the proof but cannot be used as a reference. The X-color reference proofs were produced on an Epson 7600 7-color large format printer in accordance with the ISO-Coated 12647-2 standard. The certified proof has a MediaNOVA strip and Delta E-values.
- The colors indicated in the file must be kept to. If this may be departed from, it will be stated explicitly. You are not allowed to replace PMS values with CMYK values independently.
- The document does not include technical specifications such as trapping, overfill, UCR, technical specifications relating to the printing process, the material to be printed on, etc.
- Always check the measurements used in the files.
- Color gradations must be thoroughly checked to make sure there is no bending.
- In principle, DartGroup does not include EAN codes. Wherever possible, the EAN number is indicated in the layout. Always check this number against the information provided by the client. If no EAN number is known, a standard number of zeroes will be entered.
